

Better products. Better ways to buy.

Save on Autodesk 2016 software with the best choice of Subscription options to help grow your business.

New perpetual licenses of most individual Autodesk products will not be available for purchase after January 31, 2016.

The way you buy software is changing

What's changing?

Autodesk is gradually transitioning new software purchases to subscription options only. In the first phase of this transition, new licenses of individual perpetual software products, (excluding Design and Creation Suites), will not be available for purchase after January 31, 2016.

After that time, those individual products will be available only for rent as a Desktop Subscription. Desktop Subscription is now available as quarterly, annual, 2-year and 3-year multi-year plans.

What's not changing?

Customers that already have a perpetual license or who purchase a perpetual license through January 31, 2016, will be able to continue to use those licenses going forward.

Customers with Maintenance Subscription on those perpetual licenses will continue to receive corresponding benefits for as long as the Maintenance Subscription remains active.

Why are things changing?

The majority of customers have already shown a preference for Autodesk Subscription options. This also aligns with industry trends for software delivery and cloud based offerings.

What is Autodesk doing to ease the transition for customers?

- Providing adequate advance notice of upcoming changes to help give the time needed to assess options and make plans
- Offering Maintenance Subscribers the ability to continue to renew and receive/access the benefits of their Maintenance Subscription
- Providing the ability to lock in subscription rates by introducing multi-year Desktop Subscription options
- Providing [Autodesk Account](#) as the one place to manage all products, subscriptions and services
- Continuing to offer Autodesk Design and Creation Suites perpetual licenses
